Contents

Preface
K. Conrad, M. Bachmann, E.K.L. Chan, M. Fritzler, R.L. Humbel, U. Sack, Y. Shoenfeld 19

1 Pathogenesis and Therapy of Autoimmunity in Experimental Mouse Models

Autoimmunity in men and mice: An introduction
M.P. Bachmann, K. Conrad 21

Novel autoimmune models: lessons from recent transgenic and knock in animals
M.P. Bachmann 24

Long-lived plasma cells contribute to humoral autoimmunity
F. Hiepe, A. Radbruch, R.A. Manz 43

Innate immunity and interferon production in the pathogenesis of autoantibodies in lupus
D.C. Nacionales, H. Zhuang, K.M. Kelly, S. Narain, J. Weinstein, M. Honkanen-Scott, H. B. Richards, E. Sobel, M. Satoh, W.H. Reeves 50

Autoimmune pregnancy loss – Experimental models
M. Blank, Y. Shoenfeld 71

Pathogenicity of autoantibodies reactive with the endogenous retroviral envelope glycoprotein gp70
M. Miyazawa, E. Kajiwara, N. Tabata, T. Ogawa, T. Yuasa, H. Matsumura 85

Rheumatic Fever: an animal model for a human disease
F.F. Alcantara, E. Postol, E.R. Alencar, J. Kalil, L. Guilherme 97

Demonstration of humoral autoimmunity in the tight skin-2 mouse: a model for systemic sclerosis
J. Gentiletti, S.A. Jimenez, P. Christner 98

Enhancement of autoantibody pathogenicity by viral infections in mouse models of anemia and thrombocytopenia
A. Musaji, M. Meite, L. Detalle, S. Franquin, F. Cormont, V. Préat, S. Izui, J.-P. Coutelier 99

Binding properties of a sequence-specific pathogenic Lupus anti-ssDNA autoantibody
M. Bobeck, J. Cleary, G.D. Glick 100

The role of proinflammatory stimuli in the pathogenesis of MPO-ANCA associated vasculitis in a mouse model using MPO-deficient mice
D. Huugen, H. Xiao, A. van Esch, C.J. Peutz-Kootstra, J.C. Jennette, J.W. Cohen Tervaert, P. Heeringa 102

Syngeneic cells in late apoptosis mature DC *in vivo* and induce antibodies to dsDNA and neo-epitopes of La/SS-B in immunized mice
Z. Pan, K. Davis, S. Maier, J. Workman, M.P. Bachmann, A.D. Farris 104

Peptide mimetics of anti-dsDNA idiotypes as a tool for Lupus-specific IVIG preparation: Specificity and efficacy in the treatment of experimental SLE
M. Blank, I. Nur, R. Meidler, L. Bar, L. Slutzki, B. Gilburd, Y. Shoenfeld 106

IgM anti-dsDNA antibodies as a treatment of murine systemic Lupus erythematosus (SLE)
S. Werwitzke, D. Trick, K. Kamino, T. Matthias, K. Kniesch, B. Schlegelberger, R.E. Schmidt, T. Witte 107

Selective suppression of DNA-specific B cells in lupus mice by a chimeric antibody/peptide molecule
A. Tchorbanov, E. Voynova, N. Mihailova, T. Vassilev 109

2 Natural and Pathogenic Autoantibodies

Beneficial aspects of natural autoantibodies
J. Bayry, N. Misra, A. Ephrem, A. Nicoletti, S. Lacroix-Desmazes, M.D. Kazatchkine, S.V. Kaveri 112

Receptors of the innate immunity as targets for circulating autoantibodies: antiphospholipid syndrome as a paradigm
P.L. Meroni and Y. Shoenfeld 118

Catalytically active antibodies in patients with autoimmune diseases
G.A. Nevinsky 126

3 Molecular Mechanisms of Xenobiotic-Induced Autoimmunity

Immunology and genetics of xenobiotic-induced autoimmunity
K.M. Pollard, P. Hultman, M. Arnush, B. Hildebrandt, D.H. Kono 130

Xenobiotic-induced autoimmune responses and protein aggregation diseases share a common subnuclear pathology
A. von Mikecz 145

Proteasomal-dependent antigen processing of topoisomerase I in scleroderma
M. Chen, A. Tanbajewa, A. Kuhn, T. Ruzicka, A. von Mikecz 158

The immunotoxin mercury chloride induces specific alterations in the cell nucleus
A. Scharf, M. Chen, A. von Mikecz 159

Exposure to the organic mercury compound thimerosal leads to immunosuppression followed by systemic autoimmunity
S. Havarinasab, B. Häggqvist, E. Björn, K.M. Pollard, P. Hultman 161

The importance of Fc-receptors in mercury-induced autoimmunity
K. Martinsson, P. Hultman 163

An autoimmune response to tyrosine-nitrated autologous IgG: immunogenicity of a self protein bearing the inflammation-associated marker
H. Ohmori, M. Oka, H. Shigemitsu, Y. Nishikawa, M. Takeuchi, M. Magari, N. Kanayama 164

4 Genetic Factors and Autoimmunity

Genetic Linkage and association at 1q23 in SLE
B. Namjou, K.M. Kaufman, J. Kilpatrick, J.A. Kelly, J.B. Harley 167

Peptidylarginine deiminase type 4: Identification of a rheumatoid arthritis susceptible gene
R. Yamada, A. Suzuki, X. Chang, K. Yamamoto 179

Anti-cyclic citrullinated peptide antibody production in rheumatoid arthritis is controlled by HLA-DRB1
I. Senkpiehl, M. Marget, M. Wedler, S. Jenisch, J. Georgi, D. Kabelitz, J. Steinmann 196

Gene identification of single chain format variable (scFv) anti-β2-Glycoprotein-I (aβ2GP-I) and anti-prothrombin (aPt) antibodies obtained from a primary anti-phospholipid syndrome (PAPS) patient by phage display
J. Cabiedes, M. Languren, B. Becerril, L.E. Fernández-Altuna, V. Pascual, D. Alarcón-Segovia, A.R. Cabral 198

The contribution of FcγRIIIA and interleukin 10 (IL-10) gene promoter polymorphisms to genetic susceptibility of systemic lupus erythematosus (SLE) and lupus nephritis in Russian population
I. Guseva, A. Gelonkina, E. Luchihina, M. Ivanova, V. Myakotkin 200

5 Novel Autoantibodies of Pathogenetic and/or Clinical Relevance

Autoantibody target GW bodies - cytoplasmic foci of mRNA decay and regulatory functions
E.K.L. Chan 203

Autoimmunity to the survival protein LEDGF/p75 in inflammatory disorders and cancer: Clinical and biological aspects
T.A. Brown-Bryan, T. Daniels, C.A. Casiano 209

Autoantibodies to mitotic chromosomes and spindle apparatus
R.L. Humbel..... 228

Reflections about structure, function and pathogenetic significance of Ro ribonucleoproteins
G. Steiner, A. Belisova, A. Valai, S.Hayer, E. Höfler, J. Smolen 236

Anti-laminin-1 autoantibodies in reproductive failure: animal and human studies
J. Inagaki, A. Kondo, L.R. Lopez, Y. Shoenfeld, E. Matsuura 243

False-positive perinuclear antineutrophil cytoplasmic antibody (P-*ANCA) in hemodialysis patients and analysis of their target antigens*
T. Uchimura, S. Yamada, K. Inoue, Y. Motomiya, T. Hashiguchi, I. Maruyama..... 253

Elevated anti-serum amyloid component P (SAP) antibodies in SLE patients correlate with disease activity
G. Zandman-Goddard, M. Blank, P. Langevitz, M. Pras, Y. Levy, T. Witte, A. Doria, J. Rovensky, Y. Shoenfeld..... 259

Autoantibodies to hnRNP-A1 in neuropsychiatric Lupus and other neurological diseases
G. Burguera, K. Adolph, A. Förster, G. Riemekasten, G.R. Burmester, K. Skriner 261

The 40/38 kDa hnRNP-A3, a component of the mRNA transport particle, is a novel autoantigen in patients with systemic rheumatic diseases
K. Adolph, A. Sternjak, A. Förster, G. Steiner, G.R. Burmester, K. Skriner 263

The translational suppressors TIA-1 and TIAR are targeted by autoantibodies and are overexpressed in inflamed skin of lupus patients
E. Jimenez-Boj, N. Kedersha, M. Tohidast-Akrad, F. Karlhofer, G. Stummvoll, C. Zimmermann, E. Höfler, S. Hayer, G. Schett, P. Anderson, J. Smolen, G. Steiner 265

Clinical correlations of anti-CENP-F antibodies in a cohort of patients from Southern Spain
I. Wichmann, R. Magariño, I. Magariño, A. Torres, N. Respaldiza, M. Encarnación, A. Fernández-Suarez, A. Nuñez-Roldán 267

Presence of antibodies against GSTT1 (glutathion S-transferase T1) in non-transplanted patients
I. Wichmann, I. Aguilera, J.M. Sousa, A. Bernardos, J.R. García-Lozano, A. Núñez-Roldán 269

6 Humoral Autoimmunity in Neurological Diseases

B cells and antibodies in demyelinating diseases like multiple sclerosis
T. Ziemssen 272

Autoimmunity and post-translational modifications in multiple sclerosis
R. Raijmakers, W.J. van Venrooij, G.J.M. Pruijn 290

Complex regional pain syndrome (M. Sudeck) is associated with autoantibodies against autonomic nervous system structures
F. Blaes, K. Schmitz, M. Tschernatsch, O. Matz, M. Kaps, M. Bräu 299

Association between circulating C1q- and C3d-immune complexes and the course of Alzheimer's disease
M. Cojocaru, I.M. Cojocaru, D. Iordanescu 300

IgG and IgM antibodies to neurofilaments in patients with multiple sclerosis
I.M. Malbohan, A. Bartos, L. Fialová, J. Soukupová, J. Kozeny 301

Anti-glycolipid IgG functionality predicts clinical symptoms in a Guillain-Barré syndrome animal model
N.M. van Sorge, L.H. van den Berg, M.D. Jansen, J.G.J. van de Winkel, N. Yuki, W-L. van der Pol 302

Frequencies of anti-MOG IgG autoantibodies in serum and cerebrospinal fluid of patients with multiple sclerosis depend on the nature of the antigen and western blotting assay conditions
U. Wurster, R.B. Lindert, I. Torens, F. Heidenreich 304

7 Autoantibodies in Systemic Autoimmune Diseases

Autoimmunity: Past, present and future
M. Reichlin 307

7.1 Autoantibodies in Rheumatoid Arthritis

Anti-CCP antibody - a specific and early marker for rheumatoid arthritis
A.J.W. Zendman, E.R. Vossenaar, W.J. van Venrooij, G.J.M. Pruijn 320

The diagnostic and prognostic significance of autoantibodies in patients with very early rheumatoid arthritis
V.P.K. Nell, K.P. Machold, T.A. Stamm, G. Eberl, W. Hueber, M. Uffmann, J.S. Smolen, G. Steiner 330

Immunomic analysis of synovial fluid exosomes reveals cirullinated proteins in patients with rheumatoid arthritis
K. Adolph, F. Schumann, P. Jungblut, G.R. Burmester, K. Skriner 333

Anti-CCP antibodies: Diagnostic sensitivity in Canterbury health laboratories
M.B. Spellerberg, K.K. Solanki, P.T Chapman, P.W. Moller, J.L. O`Donnell 335

Anti-CCP antibodies may occur in patients with true psoriatic arthritis
I.E.A. Hoffman, B.V. Cruyssen, H. Zmierczak, M. Vandenberghe, E. Kruithof, L. De Rycke, D. Baeten, H. Mielants, E.M. Veys, F. De Keyser 336

Low prevalence of anti-citrullinated peptide antibodies in polyarticular juvenile idiopathic arthritis
I.E.A. Hoffman, P. Dewint, S. Rogge, R. Joos, J. Dehoorne, A. Union, E.M. Veys, F. De Keyser, D. Elewaut 338

VIDAS-EDRA: the first automated testing for autoantibodies to citrullinated proteins
L. Nogueira, A. Foussadier, A. Constantin, C. Clavel, C. Vincent, A. Cantagrel, M. Jolivet, G. Serre 340

Antibodies to recombinant human 60 kDa heat shock protein in sera of patients with juvenile idiopathic arthritis
I. Hromadnikova I, D. Zlacka, H. Nguyen, P. Vavrincova 342

Cell responses to heat shock proteins 60, 65, 70 and synthetic hsp-derived peptides in patients with juvenile idiopathic arthritis
L. Sedlackova, P. Vavrincova, J. Velek, I. Hromadnikova 344

7.2 Autoantibodies in SLE

The diagnostic and prognostic role of anti-C1q Antibodies in SLE
N. Bizzaro, D. Villalta, E. Tonutti, R. Tozzoli , S. Zampieri, A. Ghirardello, A. Doria 347

Anti-C1q antibodies in Lupus nephritis
N. Miehle, F. Petschner, B. Nettlenbusch, S. Bartschat-Dominke, U.A. Walker, K. Warnatz, M. Schlesier, H.H. Peter..... 350

Identification and characterization of a SLE specific SmD3 mimotope peptide
M. Mahler, M.J. Fritzler, M. Blüthne 351

Diagnostic accuracy of the $SmD^{183-117}$ antibody immunoassay in SLE
R. Tozzoli, G. Kodermaz, N. Bizzaro, D. Villalta, E. Tonutti, A. Ghirardello, A. Doria 353

Improved detection of autoantibodies to the three ribosomal P proteins
M. Mahler, K. Kessenbrock, M. Szmyrka, P. Höpfl, M.J. Fritzler 357

Thyroid autoantibodies in patients with systemic lupus erythematosus and rheumatoid arthritis
I. Kostic, R. Petrovic, M. Bukilica, S. Zivancevic-Simonovic 359

TNF-alpha-induced surface expression of 52 kDa Ro/SS-A autoantigen is not sufficient for induction of ADCC in normal human keratinocytes.
P. Großmann, V. Gerl, C. Johnen, B. Hostmann, K. Bräutigam, N. Toman, F.-W. von Hesler, A. Radbruch, F. Hiepe 360

Antinuclear and lymphocytotoxic autoantibodies in SLE: does ANA act as lymphocytotoxic antibodies?
D. Kozáková, V. Bosák, L. Cebecauer, J. Lukác, J. Rovensky 361

CD11c high expressing dendritic cells (DCs) are upregulated in SLE
V. Gerl, P. Großmann, D. Panne, M. Gerl, A. Waka, A., B. Hostmann, K. Reiter, J. Kaufmann, A. Jacobi, T. Alexander, A. Radbruch, F. Hiepe 363

7.3 Autoantibodies in Systemic Sclerosis, Myositis and Overlap Syndromes

Anti-topoisomerase I (anti-Scl-70) autoantibodies are specific to scleroderma and are not present in patients with SLE
T. Prestigiacomo, M. Watkins, S.R. Binder 365

Autoimmune sera preferentially recognize the apoptotic 40 kDa fragment of the U1-70K antigen
G.J.M. Pruijn, D. Hof, K. Cheung, W.J. van Venrooij, J.M.H. Raats 369

PM/Scl-75 is the main autoantigen in patients with the polymyositis/scleroderma overlap syndrome
R. Raijmakers, M. Renz, C. Wiemann, W.V. Egberts, H.P. Seelig, W.J. van Venrooij, G.J.M. Pruijn 371

Autoantibodies reacting with antigen(s) of the cleavage furrow and the midbody region – specific for patients of the systemic sclerosis spectrum ?
B. Roch, K. Conrad, Uta Kießling, A.K. Menzel, M.P. Bachmann, H.E. Schröder 372

Exploring the role of caspase-3 in human dermal endothelial cell apoptosis induced by scleroderma serum
S. Ahmed 374

7.4 Autoantibodies in Sjögren's Syndrome

Autoantibodies against M3 muscarinic acetylcholine receptors in patients with Sjögren's syndrome
T. Sumida, Y. Naito, E. Wakamatsu, D. Goto, S. Ito, A. Tsutsumi, I. Matsumoto 377

Antibodies against 25-mer synthetic peptide of M3 muscarinic acetylcholine receptor in patients with Sjögren's syndrome and SLE
P. Zigon, S. Cucnik, B. Bozic, B. Rozman, M. Plesivcnik - Novljan, M. Tomsic, T. Kveder 378

Anti-α fodrin antibodies in patients with primary Sjögren's syndrome: poor analytical sensitivity or low nosographic prevalence?
N. Bizzaro, D. Villalta, E. Tonutti, R. Tozzoli 380

Patterns of anti-nuclear antibodies (ANA) among patients with primary Sjögren's syndrome with correlation to internal organ affection
H. Locht, R. Pelck, M. Høier Madsen, A. Wiik, R. Manthorpe 383

Anti-La (SSB) autoantibodies are strongly associated with internal organ damage in patients with primary Sjögren's syndrome
R. Pelck, H. Locht, R. Manthorpe 385

7.5 Autoantibodies in Atherosclerosis, Recurrent Miscarriages and Antiphospholipid Syndrome

Atherogenic role of protein-modified oxidized low-density lipoproteins and their autoantibodies
E. Matsuura, K. Kobayashi, Y. Shoenfeld, L.R. Lopez 388

Autoantibodies and recurrent miscarriages
I. Marai, Y. Shoenfeld 406

Identification of a peptide mimicing the binding pattern of anti-Cardiolipin antibodies
C. Buschmann, C. Fischer, A. Stachl, K.J. Lackner, P. von Landenberg 421

The clinical significance of the determination of antiphospholipid antibodies – a retrospective study
Z. Vanková, K. Malícková, T. Fucíková, I. Janatková, H. Marecková 422

Heterogeneous avidity of anti-β2-glycoprotein I antibodies
S. Cucnik, T. Kveder, B. Rozman, B. Bozic 424

8 Therapy-induced Antibodies

Antibodies against protein based therapeutics – an overview
H. Schellekens, A. Kromminga..... 427

Infliximab therapy in Crohn's disease induced autoantibodies restricted to antinuclear and anti-doublestranded DNA autoantibodies without autoimmune clinical manifestations
E. Blanvillain, B. Parmentier, D. Boucaud-Maitre, S. Nancey, B. Flourié, A. Moreira, J. Bienvenu, N. Fabien..... 437

Anti-nuclear antibody profiles during infliximab and etanercept treatment in spondyloarthropathy: Is induction of humoral autoimmunity by TNF-alpha blockade a class effect?
L. De Rycke, E. Kruithof, F. Van den Bosch, I.E.A Hoffman, E.M. Veys, D. Baeten, F. De Keyser..... 438

9 Methodical Aspects and Diagnostic Strategies

Guidelines and approaches to autoantibody testing
A. Wiik 441

9.1 Multiplex Assays for Autoantibody Profiling

New technologies in the detection of autoantibodies: Evaluation of addressable laser bead immunoassays (ALBIA)
M.J. Fritzler 449

Multiplexed analysis of thirteen autoantibodies using the BioPlex™ 2200 fully automated immunoassay analyzer
T. Prestigiacomo, R.L. Humbel, B. Larida, S.R. Binder 463

Multicentre evaluation of the new multiplex assay FIDIS Connective. Comparison with convencional methods
I. Abreu, A. Bastos, C. Cardoso, H. Ribeiro, N. Couceiro, A. Bodas, A.M. Pereira, J. Candeias, J.A.M. Caetano 467

Sensitivity and specificity of the FIDIS multiplex immunoassay system for the detection of dsDNA and nuclear specific antibodies in autoimmune rheumatic diseases
R. Tozzoli, G. Kodermaz, N. Bizzaro, D. Villalta, E. Tonutti, A. Ghirardello, A. Doria 469

Comparison of two multiplex assays for anti-ENA/ANA determination
I. Lochman, A. Kloudova, J. Lupac 471

Autoantibody profiling and lymphocyte characterization using autoantigen and lysate arrays
P.J. Utz, S.M. Chan 473

Development of a sensitive and reliable biochip for detection of autoantibodies in rheumatic diseases
Ch. Hentschel, W. Schoessler, J. Schulte-Pelkum, J. Kreutzberger, F. Hiepe 484

Comparison of different test systems for simultaneous autoantibody detection
T. Lüttich, M. Sticherling, D. Scholz, K. Hennig, P. Eißfeller, M. Motz, A. Kromminga 490

9.2 Antinuclear Antibodies

Distinctive features of antinuclear antibodies observed in health and in subjects with autoimmune rheumatic diseases
P.G. Leser, A. Dellavance, S.H. Barbosa, G. Guis, S.H. Rodrigues, E.I. Sato, L.E.C. Andrade 493

IgG, IgA, and IgM isotypes of anti-nuclear/-cytoplasmic antibodies
N. Werner, R.L. Humbel 510

An image inspection system for the automatic classification of HEp-2 cell patterns
P. Perner, H. Perner, R. Sonntag 511

Results of the European Consensus Finding Study Group on Autoantibodies (March 2003 – March 2004)
D. Hamann, P. Charles, M. Renz, H.P. Seelig, A. Wiik, R.J.T. Smeenk 523

The SS-A/Ro 60 kDa protein is sufficient for the detection of autoantibodies against SS-A
W. Meyer, T. Scheper, M. Siegemund, K. Takeuchi, W. Schlumberger, W. Stöcker 525

The clinical sensitivities and specificities of anti-SSA-52 (Ro-52) and anti-SSA-60 (Ro60) autoantibodies are dependent on the techniques used to detect them
R. Burlingame, A. Piette, C. Peebles, C. von Muhlen, R. Williams, M. Fritzler, P. Charles, K.M. Pollard, N. Fertig, C. Watkins, C. Oddis 527

The optimal anti-dsDNA antibody test strategy for the routine immunological laboratory?
V. Král, I. Stiborová, D. Jílek 529

Autoantibodies in two patients with selective IgM deficiency
J. Litzman, P. Nemec, V. Thon, J. Lokaj 531

9.3 ANCA

Evaluation of a new fluorescent-enzyme immuno-assay for diagnosis and follow-up of ANCA-associated vasculitis
J.G.M.C. Damoiseaux, J. Austen, M.C. Slot, M. Vaessen, C.A. Stegeman, P. van Paassen, J.W. Cohen Tervaert 533

A newly developed anti-PR3 Capture ELISA shows a higher correlation to positive cANCA results and a better serological hit rate than a direct anti-PR3 ELISA
C. Daehnrich, W. Schlumberger, C. Lehmann, W. Stöcker 534

High mobility group box-1 (HMGB-1) is a major target antigen of perinuclear anti-neutrophil cytoplasmic antibodies (pANCA) in maintenance hemodialysis patients
T. Uchimura, Y. Motomiya, T. Hashiguchi, K. Inoue, S. Yamada, I. Maruyama..... 536

9.4 Diagnosis and Prediction of Organ-specific Autoimmune Diseases

Diagnosis of goblet cell antibodies in ulcerative colitis by using the cell line HT29-18N2 as antigenic substrate
L. Komorowski, S. Mindorf, B. Teegen, S. Torkler, W. Stoecker 539

Anti-intestinal goblet cell antibodies in ulcerative colitis
M. Cojocaru, I.M. Cojocaru..... 551

The role of ASCAs in the diagnosis of Crohn's disease: Evidence for a wide variability of commercial methods and for a high prevalence in celiac patients
E. Tonutti, M. Poletto, D. Visentini, R. Maieron, M. Zilli, N. Bizzaro..... 553

The autoimmune reactions in patients with inflammatory bowel disease with rheumatic manifestations
N. Virstyuk, E. Neyko, M. Orynchak, V. Neyko 555

Comparison of the diagnostic accuracy of three methods to detect celiac disease
M. Stern, A. Patel, G. Blumenstock, T. Mothes, O. Bauer, M. Renz, H.P. Seelig 556

The diagnostic accuracy of anti-actin antibody detection by immunoblot, ELISA and indirect immunofluorescence methods in patients with autoimmune hepatitis
D. Villalta, S. Platzgummer, M. Liguori, M. Tampoia, A. Baragiotta, E. Tonutti, R. Tozzoli , N. Bizzaro 558

New ELISA for determination of glutamic acid decarboxylase (GAD65) autoantibodies in type 1 diabetes mellitus
C. Krueger, H. Brooking, B.R. Smith, W. Stoecker 561

Stratification of type 1 diabetes risk on the basis of islet autoantibody characteristics in the general population – The Karlsburg Type 1 Diabetes risk study
M. Schlosser, M. Strebelow, I. Rjasanowski, R. Wassmuth, W. Kerner 562

Heat shock protein 70 (hsp70) antibodies in immuno-mediated inner ear diseases
R. Tozzoli, G. Kodermaz, M. Tampoia, N. Bizzaro, A. Tedesco, D. Villalta, E. Tonutti 564

9.5 Miscellaneous Investigation

The role of anti-IgE autoantibodies in diagnosis of IgE mediated diseases
I. Lochman, V. Krauz 567

Alteration of autoantibodies against p53 in Taiwanese lung cancer patients undergoing chemotherapy
Y.L. Lee, C.M. Shih, H.L. Chiou, M.Y. Shiau, G.C. Chang, Y.H.Chang 570

Autoantibodies against tumor suppressor protein p53 in pleural effusions of patients with tuberculosis pleurisy
Y.L. Lee, L. Wang, C.M. Shih, Y.H. Chang, H.L. Chiou, G.H. Shen, M.Y. Shiau 571

Immunological aspect of Perthes' disease and slipped capital femoral epiphysis in children - antiphospholipid antibodies
M. Latalski, M. Koziol-Montewka, A. Gregosiewicz, M. Tokarska-Rodak, T. Raganowicz, G. Kandzierski 572

Cytofluorimetric analysis of apoptosis markers CD95/CD95L (Fas/FasL) in thyroid tissues from young patients with Graves' disease and Hashimoto's thyroiditis
A. Bossowski, A. Stasiak-Barmuta, B. Czarnocka, M. Urban, A.P. Weetman, M. Niedziela, E. Korman, J. Dadan 574

Colour Pictures 576

Index of Authors 590
