

Contents

<i>M. Barann, K. W. Miller, C. D. Richards, S. H. Roth, B. W. Urban</i> Preface: Molecular and Basic Mechanisms of Anesthesia	13
--	----

<i>G. S. Bause</i> Bernard Raymond Fink, M.D., F.F.A.R.C.S. (1914-2000)	15
--	----

1. Molecular Basis of Anesthetic Interactions

1.1 Modelling

<i>J. R. Trudell, E. Bertaccini</i> Molecular Modelling of Anesthetic Binding Sites in Ligand-Gated Ion Channels	18
---	----

<i>J. S. Johansson, G. A. Manderson</i> The Effect of Aromatic Amino Acid Side-Chain Structure on Halothane Binding to Four-Helix Bundles	23
---	----

<i>Y. Kaminoh, C. Tashiro, H. Kamaya</i> The Interaction of Local Anesthetics with the DMPG Membrane	29
---	----

<i>K. Ogli</i> Halothane Decreases the Viscosity of Bovine Serum Albumin (BSA) Solution	36
--	----

<i>Abstracts</i>	40
------------------------	----

1.2 Molecular Targets

<i>E. A. Barnard</i> The Range of Channel Structures and Their Potential Sites for Anesthetic Interaction	44
---	----

<i>J. P. Dilger, D. Ousteky, C. J. Tzan</i> Kinetics Count! Examples Using the Acetylcholine Receptor	52
--	----

<i>E. I. Eger II</i> What Have We Learned from Nonimmobilizers?	58
--	----

<i>M. Jetzek-Zader, P. Lipfert</i> Characterisation of Anesthetic Target Sites by Fluorescence: Acridine and Methyl Salicylate Have Anesthetic Properties and Interact with Albumin and Octanol	61
--	----

<i>C. Sándorfy</i> Towards a Comprehensive Theory of General Anesthesia.....	66
---	----

<i>Abstracts</i>	74
------------------------	----

2. Anesthetic Interactions with Ion Channels and Other Proteins

2.1 Nicotinic ACh Receptors

<i>H. R. Arias, E. A. McCardy, M. J. Gallagher, M. P. Blanton</i> A Barbiturate Binding Site in the Nicotinic Acetylcholine Receptor Ion Channel	80
---	----

<i>P. Flood, J. M. Sonner</i> Behavioral Results of Isoflurane Inhibition of Neuronal Nicotinic Acetylcholine Receptors.....	88
--	----

<i>P. Friederich, A. Dybek, M. Barann, B. W. Urban</i> SH-SY5Y cells: A Model for the Study of Pharmacological Action on Human Nicotinic Acetylcholine Receptors of Sympathetic Ganglions	94
---	----

<i>T. Narahashi, J. Z. Yeh, T. Mori, G. L. Aistrup, W. Marszalec, Y. Zuo, X. Zhao</i> Role of Neuronal Nicotinic Acetylcholine Receptors in the Mechanism of General Anesthesia.....	101
--	-----

<i>T. Narahashi, J. Z. Yeh, G. L. Aistrup, Y. Zuo, W. Marzalec</i> Modulation of Neuronal Nicotinic Acetylcholine Receptors by Alcohols	108
--	-----

<i>R. J. Claycomb, S. A. Forman, D. E. Raines</i> Inhibition of $\alpha_4\beta_2$ Rat Neuronal Nicotinic Acetylcholine Receptors by Nonhalogenated Alkane Anesthetics and Perhalogenated Alkane Nonimmobilizers	115
--	-----

<i>I. Wenningmann, D. Demazumder, J. P. Dilger</i> The Kinetics of Inhibition of Nicotinic Acetylcholine Receptors by Metocurine.....	120
--	-----

<i>Abstracts</i>	125
------------------------	-----

2.2 GABA_A Receptors

<i>M. H. Akabas, J. Horenstein, D. B. Williams, M. Bali, A. K. Bera</i> GABA- and Drug-Induced Conformational Changes Detected in the GABA _A Receptor Channel-Lining Segments	130
<i>G. Akk, J. H. Steinbach</i> Do Barbiturates Affect How GABA _A Receptors Open or How They Close?.....	143
<i>G. Haeseler, B. Mohammadi, K. Krampfl, M. Leuwer, R. Dengler, S. Piepenbrock, J. Bufler</i> The Potency of a Phenol Derivative for Direct Activation of Chloride Currents via GABA _A Receptors is Related to the Position of Methyl and Isopropyl Groups with Respect to the Phenolic Hydroxyl Group	151
<i>Abstracts</i>	157

2.3 Other Ligand-Gated Ion Channels

<i>M. Barann, B. W. Urban</i> Anesthetic Actions on 5-HT ₃ Receptors: Separate Access Routes and Separate Mechanisms?.....	166
<i>R. A. Harris, M. P. Mascia, I. A. Lobo</i> Sites of Anesthetic Action on a Ligand-Gated Ion Channel	174
<i>Abstracts</i>	179

2.4 Potassium Channels

<i>Z. J. Bosnjak</i> Anesthetic-Induced Cardiac Preconditioning	184
<i>M. Gruß, M. Henrich, P. König, G. Hempelmann, W. Vogel, A. Scholz</i> Ethanol Modifies Action Potentials in a Subtype of Small Sensory Neurons by Activation of BK _{Ca} -Channels.....	190
<i>L. G. Weigl, H. Kress, W. Schreibmayer</i> G Protein Gated Inwardly Rectifying Potassium Channels Are Targets for Volatile Anesthetics.....	195

<i>C. S. Yost, C. H. Kindler</i> Tandem Pore (2P) Domain K ⁺ Channels as Anesthetic Targets.....	203
--	-----

<i>Abstracts</i>	211
------------------------	-----

2.5 Local Anesthetics

<i>M. D. Baker</i> Function and Local Anesthetic Block of Late Na ⁺ Current in Sensory Neurones	214
---	-----

<i>G. L. McKinney, J. A. Harris, R. P. Burton, R. B. Fisher, G. R. Kracke</i> Inhibition of Cyclic Nucleotide-Gated Ion Channels by the Local Anesthetics Mexiletine and Lidocaine.....	219
---	-----

<i>C. Nau, S. Y. Wang, G. K. Wang</i> Involvement of Sodium Channel Transmembrane Segments S6 in Local Anesthetic Binding	221
---	-----

<i>A. Scholz</i> Blockade of TTX-Resistant Na ⁺ Currents by Local Anesthetics: Functional Impact in Sensory Neurones.....	228
--	-----

<i>S. K. W. Schwarz, E. Puil</i> CNS Effects of Local Anesthetics: Novel Lidocaine Actions in the Thalamus	233
---	-----

<i>Abstracts</i>	242
------------------------	-----

2.6 Other Proteins

<i>C. Hönemann, S. Berning, B. Linck, K. Hahnenkamp, J. Nollet, H. van Aken</i> Inhibitory Effect of Bupivacaine on Lysophosphatidate (LPA) Signaling – An Alternativ Mechanism: Stimulation of Protein Phosphatases (PP)?	248
--	-----

<i>M. Maze</i> Adrenergic Receptors Are Sites for the Analgesic Response to General Anesthetics.....	259
--	-----

<i>P. Nagele, W. J. Placzek, C. M. Crowder</i> Isoflurane Binds to Presynaptic SNARE Proteins.....	262
---	-----

<i>J. Nollet, K. Hahnenkamp, S. Sertel, T. Podranski, S. Berning, H. van Aken, E. Mortier, M. E. Durieux, C. W. Hönemann</i> Effect of Volatile and Local Anesthetics on PGE ₂ and TXA ₂ Receptors	267
---	-----

<i>S. Wittmann, S. Daniels, D. Fröhlich</i> Thiopentone and Propofol Inhibit the Expression of FMLP Receptors in Human Neutrophils in Vitro	273
<i>Abstracts</i>	279
 3. Integration of Anesthetic Actions (In-Vitro)	
3.1 Subcellular and Cellular Actions	
<i>S. Baudoux, R. M. Empson, C. D. Richards</i> General Anesthetics Do Not Prevent Action Potential Invasion of Axon Branches or Synaptic Boutons	284
<i>H. C. Hemmings Jr., W. OuYang, R. I. Westphalen</i> Presynaptic Targets for General Anesthetics	291
<i>C. H. Kindler</i> Nonimmobilizers Do Not Cause Muscle Contractures in Patients Susceptible to Malignant Hyperthermia	299
<i>M. C. Moe, J. Berg-Johnsen, M. L. Vinje</i> The Effect of Isoflurane and Sevoflurane on Presynaptic Protein Kinase C Activity	306
<i>B. A. Orser, D. T. Joo, G. Zhu, J. Roder, M. F. Jackson, Z.-P. Jia, J. F. MacDonald</i> Increased Desensitization of AMPA Receptors May Cause Hypersensitivity to Anesthetics in GluR2 Null Mutant Mice	311
<i>M. Perouansky</i> Anesthetic Targets on the Glutamatergic Terminal – Why Bother?	319
<i>C. Stößel, P. W. L. Tas, N. Roewer</i> Inhibition of the Capacitative Ca^{2+} -Entry of Primary Endothelial Cells by Volatile Anesthetics.....	324
<i>W. Zink, B. M. Graf, E. Martin, R. H. A. Fink, G. Kunst</i> Modulation of Intracellular Calcium Homeostasis by Tetracaine in Skinned Skeletal Muscle Fibres – Reasons for Its Moderate Myotoxicity?	330
<i>Abstracts</i>	337

3.2 Networks (Slices)

<i>T. Asahi, K. Hirota, R. Sasaki, M. Yamazaki</i> Effects of Volatile Anesthetics, n-Alcohols and Ketamine on Synaptic and Non-Synaptic Pathways in Rat Hippocampal Slices in Vitro	348
<i>C. Benkowitz, N. Roewer, B. Antkowiak</i> Anesthetic Action on Neuronal Network Activity in Hippocampus: Electrophysiology and Ca-Imaging.....	355
<i>C. Grasshoff, B. Antkowiak</i> Effects of Volatile Anesthetics on Action Potential Firing of Spinal Neurons in Organotypic Slice Cultures	363
<i>K. Hirota, T. Asahi, R. Sasaki, M. Yamazaki, S. H. Roth</i> The Agent- and Pathway-Specific Actions of General Anesthetics in Hippocampus in Vitro	370
<i>J. Kendig</i> Anesthetic Actions on the Spinal Cord in Vitro	376
<i>S. H. Roth, N. Samanani, D. P. Archer</i> Receptor-Mediated Excitatory Effects of General Anesthetics.....	381
<i>R. Sasaki, K. Hirota, M. Yamazaki</i> Barbiturates Accelerate the Recovery from Brief Hypoxia in Area CA1 of Rat Hippocampal Slices.....	387
<i>Abstracts</i>	393

3.3 Other Networks

<i>U. Guenther, A. M. Bischoff, D. Kettler, D. W. Richter</i> 5-HT _{1A} -Agonists Protect Against Opioidergic Depression of Respiration	400
<i>S. Pentyala, J. Halpern-Lewis, An. Sawas, D. Rosa, Ay. Sawas, M. Rebecchi, S. Vitkun</i> Intravenous Anesthetics Reduce Airway Resistance by Their Action on Plasma Membrane Calcium Pump	404
<i>P. W. L. Tas, C. Eisemann, N. Roewer</i> The Volatile Anesthetic Halothane Suppresses Spontaneous Calcium Oscillations in Hippocampal Neurons by Activation of Adenosine A1 Receptors.....	411
<i>Abstracts</i>	417

4. In-Vivo-Networks

4.1 Human

W. Heinke, C. Schwarzbauer

Subanesthetic Isoflurane Affects Task-Induced Brain Activation in a Highly Specific Manner: A Functional Magnetic Resonance Imaging Study..... 422

P. Jakubow, J. J. Braszko

The Effect of Propofol on Short Term Memory After Anesthesia 429

S. Nishimura, S. Yokono, N. Taenaka, T. Mashimo

General Anesthesia Suppresses Nocturnal Melatonin Secretion 436

B. Rehberg, T. Kammer, H. C. Wartenberg, I. Wenningmann, B. W. Urban

Effects of Sevoflurane and Propofol on the Human Motor System 442

R. A. Veselis, R. A. Reinsel, V. A. Feshchenko

Novel Insights into Drug – Memory Interactions Using Functional Neuroimaging (FNI) Techniques..... 447

Abstracts 457

4.2 Animal

A. Angel

Oscillations in an Apparent Steady-State of Anesthesia 462

A. Angel

Effects of Xenon on Somatosensory Transmission in the Rat..... 468

J. F. Antognini, E. Carstens

Spinal Cord Actions of Halothane, Thiopental and Isoflurane 474

J. F. Antognini, E. Carstens, M. Sudo, S. Sudo

Thiopental Directly Depresses Lumbar Dorsal Horn Neurons in Goats 480

O. Detsch, W. Reeker, M. Siemers, E. Kochs, B. Bromm, C. Vahle-Hinz

Suppression of Tactile Information Transfer by Isoflurane Within the Central Nervous System..... 484

S. Gamo, A. Tamai, I. Hotta, T. Koma, Y. Tanaka

A Possible Anesthetic Pathway of Diethylether Derived from *Drosophila* Mutants..... 493

<i>H. Nakao, T. Uefuji, N. Miyashita</i> Enflurane Sensitivities of Mice May depend on the Color of the Fur	500
<i>J. M. Sonner</i> GABA _A Receptors Contribute Minimally to Isoflurane MAC	505
<i>P. H. Tonner</i> Does the NO/cGMP Signal Transduction Pathway Mediate the Action of General Anesthetics?	509
<i>C. Vahle-Hinz, W. Reeker, O. Detsch, M. Siemers, E. Kochs, B. Bromm</i> Antinociceptive Effects of Anesthetics in Vivo: Thalamic Neuronal Responses and Cellular Mechanisms	516
<i>Abstracts</i>	525

4.3 Anesthetic Depth

<i>E. I. Eger II</i> Anesthesia Produced by Inhaled Anesthetics Is an Immediately Reversible State Mediated by the Central Nervous System that Consists of Amnesia and Immobility in the Face of Noxious Stimulation	530
<i>T. Engelhardt, H. F. Galley, F. M. MacLennan, N. R. Webster</i> Changes of Saliva Cyclic GMP in Healthy Volunteers and Patients Undergoing General Anesthesia	532
<i>C. Lynch III</i> MAC - A Clinical Point of View	537
<i>J. M. Sonner</i> Population Variability in MAC: What Is It and What Does It Mean?	545
<i>M. Bleckwenn, B. W. Urban</i> Is the Meyer-Overton Correlation Still Relevant?	550
<i>Abstracts</i>	558
